

Safe for Food Contact Statement

5.3 Gallon Blue Leakproof HDPE Plastic UN Rated Jerry Cans with Natural Tamper-Evident Cap

This is to declare that the above mentioned product is a food safe container to store food grade materials. The material which the container is made up of is high density polyethylene (HDPE). In 21 CFR Chapter I Subchapter B Part 177 Indirect Food Additives: Polymers, the material Polyethylene is recognized as one of the safe substances for use as basic components of single and repeated use food contact surfaces.

On the bottom of the above mentioned product (container) a 'HDPE 2' mark in a triangular shape is printed to indicate the container is made up of FDA approved food safe material. The closure materials tamper evident cap is also made up of same HDPE material. Based on the facts we declare that the above mentioned container is safe to be used as a container for food grade materials.
