

Letter of Guarantee

Hydrogen Peroxide 30% Solution, Food Grade, Kosher, Halal

Quality Commitment

Lab Alley maintains ISO 9001 certification and utilizes our Quality Manual as the framework to provide continued compliance with ISO standards. The organization has comprehensive programs and procedures in place for change control, investigations (including root cause analysis), document control, training, supplier qualification, control of non conforming product, pest control, customer complaints, preventive maintenance, product recall, and internal audits.

Intentional Adulteration/Food Defense

Lab Alley has mitigated the potential for intentional adulteration of product and raw materials at our facility. This mitigation is achieved by our supplier approval process and facility security. All buildings have electronic access limited to authorized personnel only. Raw materials are only purchased through approved suppliers that have completed our initial questionnaire. All material is inspected upon receipt and approved by the Quality unit prior to use.

Packaging

Lab Alley utilizes food grade, high density polyethylene (HDPE), and BPA-free bags/containers for our primary packaging. The primary packaging bags/containers comply with specifications in the FDA regulation 21 CFR 177.1520.

Notes: Product specifications, test results, analytical methods, and shelf life is provided on the Certificate of Analysis (CoA), which can be accessed on our website, and/or provided upon request.
