

Allergen Statement

MCT Oil Coconut Based USP/FCC/Food Grade

Lab Alley purchases MCT Oil Coconut based from manufacturers that declare their products do not contain known added proteins or allergens listed by the FDA.

Lab Alley doesn't add any allergens or comes into contact with MCT Oil Coconut during receiving, storage, transfer and packaging of our MCT Oil products.

The product is free from allergens listed below:

Celery, Cereals, Crustaceans, Eggs, Fish, Milk, Lupin, Mollusks, Mustard, Nuts, Peanuts, Sesame Seeds, Soya, Sulphur Dioxide

Please note, this product is derived from coconut, but coconut is not a botanical nut and is considered a fruit, however, the U.S. FDA recognizes coconut as a tree nut, therefore, an allergen. While allergic reactions to coconut have been documented, most people who are allergic to tree nuts can safely eat coconut. This, however, is at the discretion of our customers to determine proper labeling of their products. While the product is produced in an allergen free facility, any allergenic material from the coconut (per U.S. FDA guidelines) is removed through proper fractionation processes and therefore, is considered allergen free. Independent lab testing of this product can confirm this product is free of allergens, however, testing is not completed on every lot of product. The statement above is based on our current level of knowledge related to the product and the documentation provided by the manufacturers of the product.
