AUSTIN – Lab Alley, a national e-commerce provider of high-purity lab chemicals and high-quality lab supplies, recently launched a new auto-ship option for its 50K+ customer base – a feature designed to empower clients to get the chemicals they need as speedily and affordably as possible.

“Our auto-ship program adds significant value for our customers,” said Lab Alley CEO Fred Elabed. “As the chemical and lab supply shortages spurred by the pandemic continue, this is the easiest way for companies to get the chemicals they use every day reliably, quickly, and at the lowest possible price-point.”

To participate in Lab Alley’s auto-ship program, customers at LabAlley.com simply choose the product they want, click the auto-ship option, and select their desired frequency of delivery. Then that item is automatically shipped to them at that frequency, effortlessly replenishing their critical supplies.

The auto-ship option also offers Lab Alley customers:

- 99% product availability guarantee;
- Same-day shipping for orders submitted by 1p.m. CT;
- Lowest possible price; and
- No contracts or long-term commitments – cancel anytime.

“More than 100 of our customers are already enjoying our auto-ship program,” noted Elabed. “It does all the heavy lifting to keep the supply chain moving forward for them. And our customer-care team can process multiple auto-ship products within a single account super-easily, complete with customer notes and all within just a few minutes. So auto-ship saves time, enhances productivity, and keeps costs down – for us as well as for our customers.”
